I am a Full Stack Web Developer with experience in JavaScript, recognized for my adaptability in diverse environments and my ability to work effectively in teams. My passion for learning and my long-term goal is to establish myself in the technology field, growing as a programmer within a development team. Additionally, I have over a year of experience working as a freelancer, which has allowed me to refine my skills and acquire a deep understanding of creating high-quality web applications.

PROJECTS

Full Stack Web Developer – Inmuebles 360 (Oct 2023 - Nov 2023)

Academic Experience: Henry Bootcamp

<https://vimeo.com/881328120?share=copy>

Created an application with the aim of a real estate rental, whether for living or for staying during a vacation. This platform simplifies the process of renting and managing properties, providing a user-friendly experience for both property owners and tenants.

I developed several features as part of the project, including implementing a payment gateway with Stripe. Additionally, I contributed to the development of the admin view and worked on establishing the frontend styling structure using Tailwind CSS.

Technologies used:

Frontend: React, Javascript, Html, Redux, Tailwind, Bootstrap, antDesign

Backend: Node.JS, Express, MongoDB, Nodemailer, Passport, Stripe, Formik
